

Dantes L Parales

1

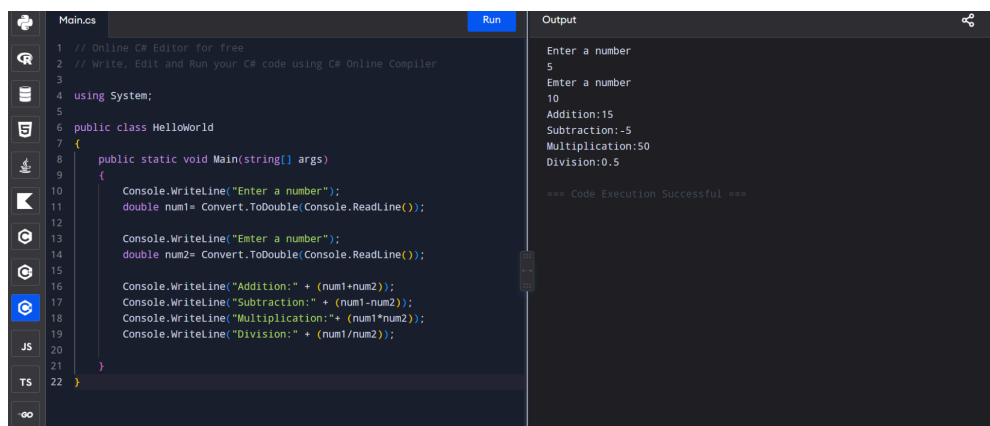

The screenshot shows the C# Online Compiler interface. The code in `Main.cs` prompts the user to enter their name, course, year level, and section. The output shows the user's input: Name: dantes, Course: BSIS, year level: 2nd year, section: BSIS01.

```
1 // Online C# Editor for free
2 // Write, Edit and Run your C# code using C# Online Compiler
3
4 using System;
5
6 public class HelloWorld
7 {
8     public static void Main(string[] args)
9     {
10         Console.WriteLine("Name");
11         Console.ReadLine();
12         Console.WriteLine("Course");
13         Console.ReadLine();
14         Console.WriteLine("year level");
15         Console.ReadLine();
16         Console.WriteLine("section");
17         Console.ReadLine();
18     }
19 }
```

Output:

```
Name
dantes
Course
BSIS
year level
2nd year
section
BSIS01
```

2

The screenshot shows the C# Online Compiler interface. The code in `Main.cs` prompts the user to enter two numbers and then calculates their addition, subtraction, multiplication, and division. The output shows the results: Addition: 15, Subtraction: -5, Multiplication: 50, Division: 0.5.

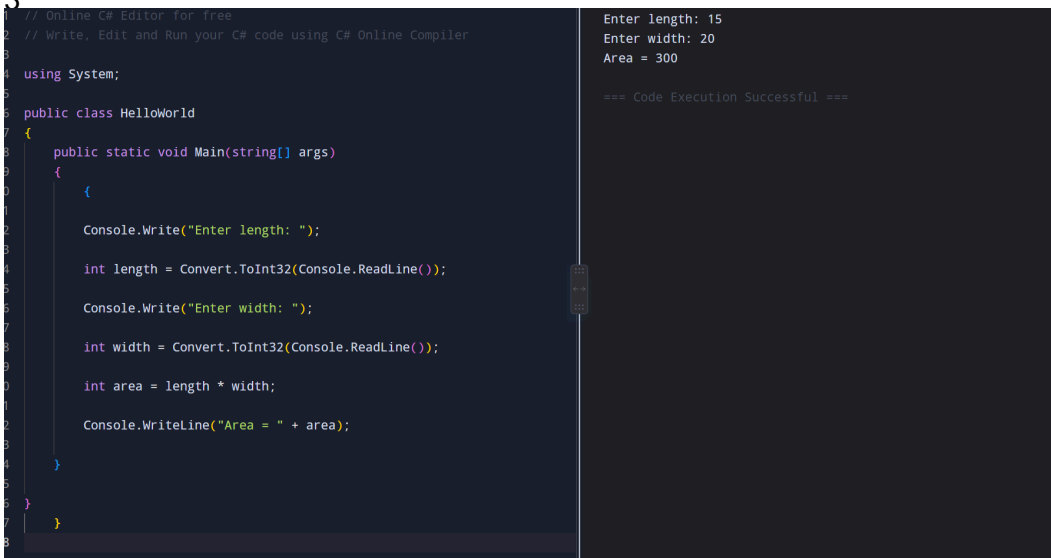

```
1 // Online C# Editor for free
2 // Write, Edit and Run your C# code using C# Online Compiler
3
4 using System;
5
6 public class HelloWorld
7 {
8     public static void Main(string[] args)
9     {
10         Console.WriteLine("Enter a number");
11         double num1= Convert.ToDouble(Console.ReadLine());
12
13         Console.WriteLine("Enter a number");
14         double num2= Convert.ToDouble(Console.ReadLine());
15
16         Console.WriteLine("Addition:" + (num1+num2));
17         Console.WriteLine("Subtraction:" + (num1-num2));
18         Console.WriteLine("Multiplication:" + (num1*num2));
19         Console.WriteLine("Division:" + (num1/num2));
20     }
21 }
22 }
```

Output:

```
Enter a number
5
Enter a number
10
Addition:15
Subtraction:-5
Multiplication:50
Division:0.5

=== Code Execution Successful ===
```

3

The screenshot shows the C# Online Compiler interface. The code in `Main.cs` prompts the user to enter the length and width of a rectangle and then calculates its area. The output shows the results: Enter length: 15, Enter width: 20, Area = 300.

```
1 // Online C# Editor for free
2 // Write, Edit and Run your C# code using C# Online Compiler
3
4 using System;
5
6 public class HelloWorld
7 {
8     public static void Main(string[] args)
9     {
10         {
11             Console.Write("Enter length: ");
12
13             int length = Convert.ToInt32(Console.ReadLine());
14
15             Console.Write("Enter width: ");
16
17             int width = Convert.ToInt32(Console.ReadLine());
18
19             int area = length * width;
20
21             Console.WriteLine("Area = " + area);
22         }
23     }
24 }
```

Output:

```
Enter length: 15
Enter width: 20
Area = 300

=== Code Execution Successful ===
```
